

Carpet Tile Program

Welcome to your Columbia University / Mohawk product guide – designed specifically for Columbia University. This booklet contains CUF pre-approved options for modular carpet tile. Any product not shown specifically herein requires Design Development Phase approval from CPM and Operations prior to proceeding to construction drawings.

Mohawk is proud to be the largest recycler in the flooring industry. We use recycled content in more than 500 of our products and offer customers accessible ways to recycle carpet through our ReCover carpet recycling program. We operate two recycling facilities: one that recycles 6.2 billion plastic bottles annually (45.8 percent of all bottles collected in North America), which are converted into Envirostrand carpet; and another that recycles carpet fiber into nylon and polypropylene pellets for the automotive parts and furniture industries.

Product Overview

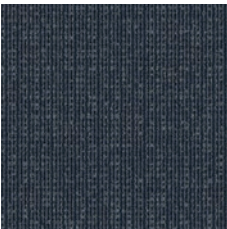

The versatility and flexibility of carpet tile from Mohawk Group offers nearly limitless possibilities without compromising style, quality and value. Carpet tile is a durable solution for the commercial space, allowing added texture, edgy combinations and endless options in running line and custom patterns.

Within New York City's bustling fashion district, Mohawk Group now boasts an innovative 13,000-square-foot flagship showroom that fully incorporates the company's "Believe in Better" mantra to reflect new chapter of sustainable design.

Mohawk Group Sustainable NYC Showroom

Just how sustainable is it? The showroom officially met the requirements for WELL Building Standard Platinum and LEED v4 Gold certification. Designed by Gensler, the 13,000-square-foot Chelsea retail space is one of the few projects in the world to be certified under both programs. To meet the stringent requirements of both certifications, Mohawk implemented unique measures to support employee health and wellness and incorporate nature-inspired design, while also leaving a positive impact.
